

# DIGITAL DENTISTRY: THE ENGINE THAT SUPERCHARGES PRACTICE GROWTH

## OCTOBER 7 2022

### The Oaklander

5130 Bigelow Blvd | Pittsburgh, PA 15213

8:30am-3:30pm | 6 Credit Hours

Presented by **Steven Hernandez**, DDS

Clinical Leader with Lifetime Dentistry, Nashville, TN

There are many reasons dentists should be incorporating CAD/CAM and 3-D imaging technology into their practices. This fun, energetic talk will cover incorporating these technologies into your practice, ROI, and engaging/empowering your team to embrace and utilize the new workflows.

#### CAD/CAM

Single unit restorations, smile designs, and the benefits of restoring implants with CAD/CAM vs a lab will be discussed.

#### 3-D imaging

How to overcome the fear of “what if I miss something...?” and concentrate on improved diagnostics and case acceptance that come from utilizing this technology. Additionally, fabricating surgical guides (3D printing), screening patients for sleep apnea by segmenting the patient’s airway and other ways to use 3-D imaging in your practice, even if you’re not placing implants, will be covered.

This course is for those who are considering CAD/CAM & 3D imaging and new users who wish to know how these technologies can improve their practices.

\$75 Delta Dental and \$50 Staff of Delta Dental

\$295 Non-Delta Dental and \$145 Staff of Non-Delta Dental
