

I HAVEN'T GOT TIME FOR THIS PAIN!

Dental Pain Management for the Entire Team

This course satisfies the requirements of the MATE ACT

Dr. Tom Viola

Description

This program will provide participants with a comprehensive understanding of the pharmacology and therapeutics of local anesthetic agents and analgesics. Special emphasis will be given to effective perioperative pain management and best practices for prescribing analgesics for postoperative pain control.

Objectives

- Discuss local anesthetic agents with respect to their mechanisms of action, adverse effects, contraindications and clinical considerations.
- Differentiate between the two major classes of local anesthetic agents with respect to their distribution, metabolism, adverse effects, drug interactions and contraindications
- Identify techniques useful in recognizing and identifying potential opioid addiction and current protocols for its treatment.
- And More!

This course meets the DEA's requirements of 8 hours of one-time prescribing training - MATE Act of 2021
