

# Welcome to your DeltaCare<sup>®</sup> USA plan

Welcome to your DeltaCare USA plan! With this plan, in most states you'll choose a primary care dentist from the DeltaCare USA network. This dentist handles all your care — cleanings, exams, fillings and more. If you need to see a specialist — like an orthodontist, for example — your primary care dentist will refer you.

When you visit your primary care dentist, you'll pay set copayments for covered procedures. This makes it easy to budget for upcoming dental treatment. Your plan booklet contains a full list of all covered procedures and their copayments. You don't have to worry about deductibles or maximums — your plan doesn't have any.

Ready to get started? First, you'll need to pick a dentist.

To search for a DeltaCare USA dentist, just head to [deltadentalins.com](http://deltadentalins.com). Enter your address, city and state or ZIP code, and choose "DeltaCare USA" from the drop-down menu. If you want to narrow down your search, you can adjust the distance, language spoken, available office hours and more. You can even see Yelp ratings from real patients to help you choose.

OK, so now you've found a dentist you like. It's time to make it official. Make a note of the facility number. This six-digit number is listed by the office address. Just log in to your online account and submit your selection. If you don't have an account yet, it's easy to sign up. Under your account, go to the "Choose Provider" tab, and enter the facility number for your chosen dentist. If you submit your selection by the 21st of the month, it'll take effect on the first day of the next month. And remember, you can change your dentist at any time. If you prefer, you can also call Customer Service to select or change your dentist.

And now you're ready to start using your DeltaCare USA plan!
